SUBJECT INDEX

CH_4 plasma
the composition of the —, 1
CO_2
experimental gas-phase ion/molecule clustering of COS^+ with — and N_2O, 143
COS^+
experimental gas-phase ion/molecule clustering of — with CO_2 and N_2O, 143
CS_2
the energy dependence of the reaction of N_2^+ with —, 125

DCl^+ ($v = 1$) ions
radiative lifetimes of vibrationally excited HCl^+ ($v = 1$) and —, 203

electrohydrodynamic mass spectrometry
mass transport and ion pairing effects in —, 325
electron impact partial ionisation cross-sections
a pulsed crossed beam apparatus for measurement of —: results on $CO_2 + e^- \rightarrow CO_2^+ + 2e^-$, 283

free jet flow reactor
a — for ion/molecule reaction studies at very low energies, 55

HBr^+
selected ion flow drift tube studies of the reaction of — with various neutral molecules, 211
HCl^+ ($v = 1$) ions
radiative lifetimes of vibrationally excited — and DCl^+ ($v = 1$) ions, 203
heteronuclear isotopic molecular ions
spark source mass spectrometric abundances of homo- and —: dependence on analyser pressure, 219
homonuclear isotopic molecular ions
spark source mass spectrometric abundances of — and heteronuclear isotopic molecular ions: dependence on analyser pressure, 219

ion accumulation process
mechanism for an — in external source Fourier transform mass spectrometers, 295
ion pairing effects
mass transport and — in electrohydrodynamic mass spectrometry, 325

mass transport
— and ion pairing effects in electrohydrodynamic mass spectrometry, 325
methyl compounds
charge separation mass spectrometry. Part 2. —, 175
MS9 mass spectrometer
modification of an — for double-charge-transfer spectroscopy, 165

N_2^+
the energy dependence of the reaction of — with CS_2, 125
N_2O
experimental gas-phase ion/molecule clustering of COS^+ with CO_2 and —, 143

oxidation processes
interference effects caused by — and reduction processes in fast atom bombardment mass spectrometry, 265
oxygenated $C_{(4)}$ molecules
relative ionization cross-sections of —, 117

positron ionization mass spectrometry
— I: Instrumentation, 227
— II: Ionization by fast positrons, 237
primary ion polyatomicity
effects of — and kinetic energy on secondary ion yield and internal energy in SIMS, 35
pulsed crossed beam apparatus
a — for measurement of electron impact partial ionisation cross-sections: results on $CO_2 + e^- \rightarrow CO_2^+ + 2e^-$, 283

reduction processes
interference effects caused by oxidation and — in fast atom bombardment mass spectrometry, 265

secondary ion yield
effects of primary ion polyatomicity and kinetic energy on — and internal energy in SIMS, 35
silver clusters
fission-like dissociation of doubly charged —, 47
sodium chloride molecules
temperature dependence of the positive ionization efficiency of — incident upon a polycrystalline tungsten surface heated in a high vacuum, 131
spontaneous desorption
—: field assisted ion induced desorption mass spectrometry, 311
supersonic molecular beams
electron impact mass spectrometry in —, 87
suspended trapping measurements
Fourier transform mass spectrometric detection of — with a variable length external ion reservoir, 151

time-lag focusing
mass dependence of — in time-of-flight mass spectrometry: an analysis, 93

vinyl radical
gas phase ion chemistry of the vinylidene radical anion and the acidity of the —, 253
vinylidene radical anion
gas phase ion chemistry of the — and the acidity of the vinyl radical, 253
